SEE OFFICE ACTION	ON THE FOLLOWING PAGES		

U. S. Petent and Trademark Office PTO-326 (Rev. 9-95) Application/Control Number: 09/094286

Art Unit:

· •

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Arai 264767.

In figure 2 the Arai patent discloses a valve plate having a plurality of firs nozzles 21A arranged concentric to the axis, a plurality of second nozzles 21B on a second concentric circle larger in diameter than the first circle. The cross-sectional area of the second openings 21B is smaller in diameter than the cross-sectional area of the first openings 21A.

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harper in view of Tani eyt al.

The Harper patent disclose a fuel injector having a plurality of concentric groups of nozzles in which the cross-sectional area of the openings on each outwardly succeeding concentric circle decreases in area and the acute angle they make with the axis increases (see

Serial Number: 08/518866

Art Unit:

column 2 lines 40-55). The claimed invention is distinguishable from Harper by its recitation of the openings being formed in a plate and a driving device.

It is deemed to have been obvious to one of ordinary skill in the art to disintegrate the valve housing in Harper into a separate plate and body as taught by Tani at 52 for ease in manufacturing and replacement as well-known in the art. Further, It is deemed to have been obvious to one of ordinary skill in the art to incorporate a drive means as taught by Tani 32 fro more accurate injection control as well-known in the art.

- With respect to the first 5 lines on page 1 of the specification only US Patents can be 5. incorporated into the disclosure by reference.
- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sofinak, Romann and Kind are cited for their orifice plates. Suilzer is cited for tis two orifce sizes.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Weldon whose telephone number is (703) 308-1117. The examiner can normally be reached on Tues-Fridays from 7 am to 6 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andres Kashnikow, can be reached on (703) 308-1137. The fax phone number for this Group is po f vou (703) 308-7764.

Serial Number: 08/518866
